

FOR IMMEDIATE RELEASE

October 22<sup>nd</sup>, 2015

## Texas Disposal Systems Announces Partnership with **FIRST® LEGO® League**

Texas Disposal Systems is excited to announce our partnership **FIRST in Texas** through the **2015 FIRST® LEGO® League (FLL®) Challenge**. TDS will support the participating teams by providing education, knowledge and comprehensive understanding of our industry and the environmental challenges we face today and in the future.

This year, FLL will be featuring a Trash Trek Challenge that requires teams to create a Trash Trek mission model from LEGO elements. Each team will identify a challenge in our industry and then create a solution that adds value to society by improving something that already exists, using something that exists in a new way, or inventing something totally new.

TDS strives to provide continual awareness within our schools and society of how future generations can participate in providing environmental solutions and we applaud the FLL coaches, mentors and students for featuring the Trash Trek Challenge as the 2015 FLL competition. We look forward to the creative ideas these talented teams will present to our industry.

**Texas Disposal Systems** offers solid waste services, recycling, and composting to residential communities, schools, businesses, and cities. TDS was founded in 1977 with a mission to provide the highest quality waste processing services while keeping the best interests of our customers, employees, and environment a priority. The TDS landfill is the state's first totally integrated facility of its kind, incorporating solid waste disposal, compost production, and recycling operations from inception.
